15 years experience in the industry gives Geosynthetics the distinct edge in its ability to source the best quality products at competitive rates.

The Ramside Hall Hotel is a long established hub for Golf and home to the new hybrid sport of Foot-Golf in the North East. Their requirement was for a readily available, strong, long lasting stop net product.

The Tenax CintoFlex M product is manufactured using the same technology and machinery supplying the UK civil engineering industry, with the superior Tenax geogrids for all types of ground reinforcement. This means the CintoFlex M has the same high junction strength because it is a monolithic type product; this gives the product both strength and dimensional stability. CintoFlex M has a mesh pitch of just 18mm x 25mm and roll widths of 1m to 4.6m. Perfect properties for use as a ball stop fence.
