Heavy Duty Pavers

Total Traffic Exopave

Heavy Duty Pavers

Material:	Neutral to the environment made out of 100% recycled plastic
Colour:	Grey
Infill Options:	Soil and seed, 10-20mm clean angular gravel and Total Traffic Exopave brick inserts
Dimensions:	80 x 40 x 6cm with 32 chambers (size 8 x 8cm), 1m ² = 3.125 pieces
Effective dimensions:	80 x 40 cm (plus 1.5 cm for edge surfaces due to the interlocking)
Web thickness:	Inside: 15 mm Outside: 20 mm
Weight:	8.5 kg (26 kg/m ²)
Loading capacity, static:	147 kN (15 t) per test body (20 x 20cm, consisting of 4 unfilled chambers) 10 N/mm ²

Total Traffic Exopave is a permeable paving system that combines strength with versatility. Made from recycled HDPE, the interlocking pavers can be filled with either grass or gravel providing a SuDs compliant solution.

Features:

- **Designed for use with HGV Traffic**
- **High shear strength reduces limitations whilst accelerating, braking and turning**
- **Easy to install and maintain**
- **Reduces sub base depths**
- **Textured surface for improved grip**
- **High water permeability**
- **Sympathetic to the natural environment**
- **Wheelchair regulations compliant**

Applications:

- HGV and coach parking
- Lay-bys and verge reinforcement
- Intensively used car parks
- Service yards and industrial estates
- Access roads for emergency vehicles
- Farm and rural roads
- Private roads
- Hard standing areas for motorhomes
- Light aircraft apron
