GOLPLA®

Kirkleatham Crematorium
Parking facility

MARKET SECTOR:
Commercial

LOCATION:
Kirkleatham Crematorium
Fishponds Road, TS11 8HH

CONTRACTOR:
Cleveland Land Services Ltd

MERCHANT:
J T Dove

The BACKGROUND

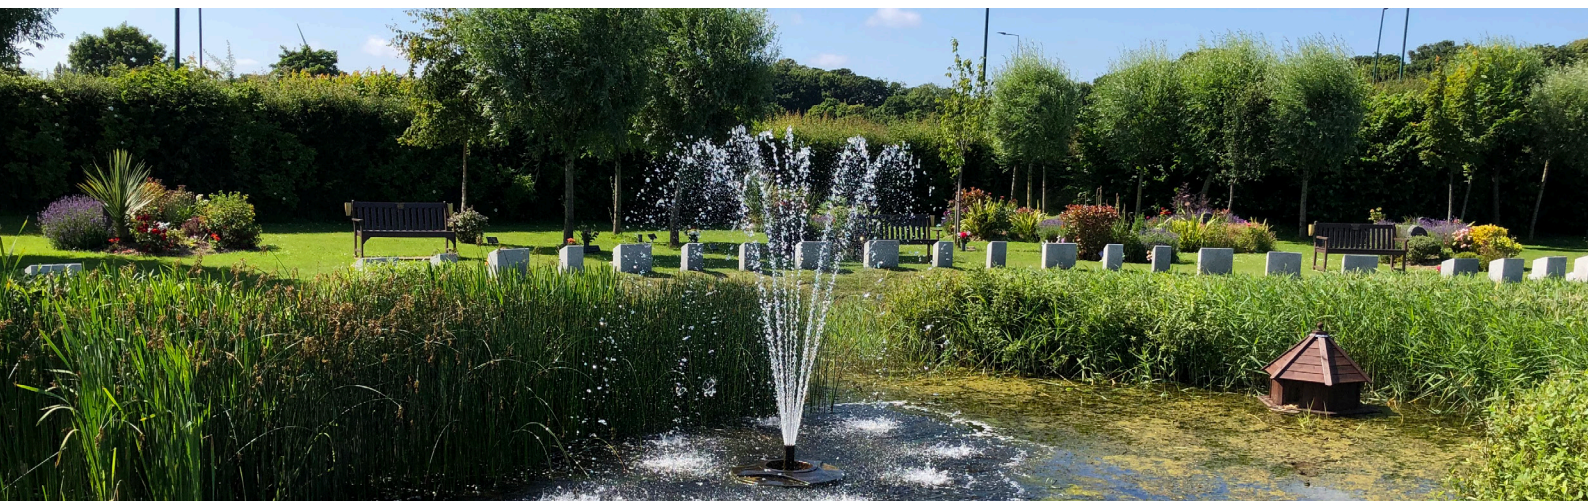

The Kirkleatham Memorial Park and Crematorium has been developed over a number of years.

Due to the increasing popularity and diversity of services offered, it was necessary to increase the visitor parking capacity by extending their permanent car parking provision.

Our Client's REQUIREMENTS

A sustainable solution for reinforced parking.

Cleveland Land Services have a long association with the facility, having had the privilege to undertake the original landscaping works.

Our Value Engineered SOLUTION

The specification for Golpla® Buff came from the Landscape Architect who wanted to maintain aesthetics and work in co-ordination with the gold gravel that was selected to infill the units.

Not only did the Buff coloured units provide a pleasing finish, this also complied with their sustainable drainage requirements and has been installed to the client's specification.

“The product was good to lay and looks excellent. The whole job is a credit to everyone involved and a pleasure to work on”

BRIAN DUNN

Director of Operations
Cleveland Land Services

“Geosynthetics have always been very reliable and efficient in dealing with our orders, highly recommended”
