#### MARKET SECTOR:

Built Environment

#### LOCATION:

Washingborough Road  
Lincoln, LN4 1EF

#### CONTRACTOR:

O'Boyle Civil Engineering Ltd

#### INSTALLER:

O'Boyle Civil Engineering Ltd

#### CONSULTANT:

Influence Landscape Architects

## The

# BACKGROUND

**Origin of this project began back in 2018 when a seminar was held with landscape architects Influence.**

This covered the use of Golpla with gravel fill so in 2019 when the project at Lincoln Crematorium needed a new car park it looked an ideal solution.

## Our SOLUTION

A new car park solution for Lincoln Crematorium.

**Designs were drawn up and discussed with the client but before committing they asked to visit a site installation.**

The Jubilee Medical Centre was chosen and Lindsey Arkley from Influence met with Paul Gent to view the Golpla.

This convinced them and advice was given on using Golpla combined with Cellweb as tree root protection which was also a requirement.

Work began in August 2021 but prior to this Paul Gent met with Rob O'Boyle from O'Boyle Civil Engineering Ltd.

As the groundworkers for the project they had asked for advice on installation and interpreting the build up to suit site conditions.

Also discussed were aggregates and sizes for both aspects of the build-up.
