

Golpla Quicklay®

No Dig Grass Paving System For Greenfield Sites

Golpla Quicklay® has been developed to efficiently convert existing grassed areas into access roads, car parks, footpaths and tow paths etc. Quicklay® installations require no excavation and therefore there is no need for costly construction equipment and plant. Removal of site spoil is also significantly reduced, ensuring the installation is remains a cost effective solution.

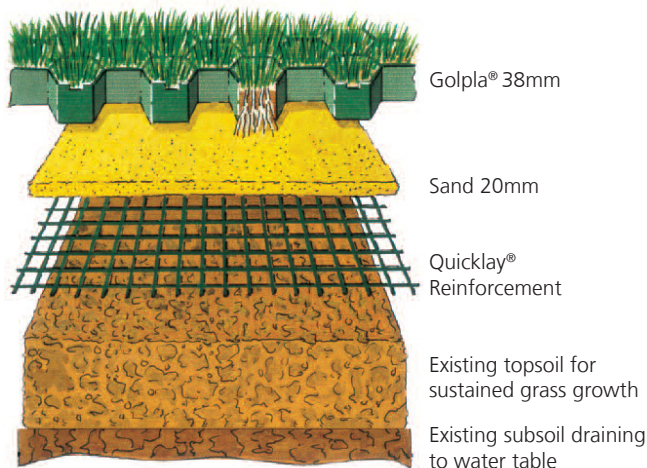

Applications

- Car parking
- Heavy pedestrian use
- Access roads
- Wheelchair access
- Cycle paths
- Caravan parks
- Tow paths
- Helipad's

Benefits

- Quick construction
- Minimal surface preparation
- No heavy plant required
- Minimal site spoil to dispose
- Quicker re-establishment of grass
- Ease of access to buried services
- Site can easily be cleared and returned to original condition

The site is prepared simply by removing all vegetation and making good. A Quicklay® Geogrid is then laid on the foundation and blinded with 20mm of sharp sand. Golpla® pavers are placed, secured and filled with soil and the appropriate grass seed mix.
